

SK90 INJECTION SYSTEM.

SK90 INJECTION SYSTEM.

Enhance your grouting operation with Carbothix injectable resin and the SK90 Injection System.

Field-tested and engineered for the harsh mining environment, the SK90 Injection System is a simple to use chemical injection and grouting system.

Designed to provide you with a perfect mixing ratio on select chemical products, it eliminates the headaches of questionable installation quality of traditional grouting systems.

Paired with Carbothix™, Minova's leading fast-setting resin, grout, anchor and tension your bolts and cables in minutes.

SK90 INJECTION SYSTEM

- ▶ Simple to operate and no electronics
- ▶ Fully contained system to prevent operator exposure to chemicals
- ▶ Easy access to system components for maintenance
- ▶ Easily handled by forklift
- ▶ 2500-lbs capacity
- ▶ Small footprint (5' x 6')

SK90 PUMP

- ▶ Exact mixing ratio
- ▶ Constant and pulse-free pumping
- ▶ Operates on mine air
- ▶ Rapid grouting and reduced mess
 - Up to 6-gpm of pumping
- ▶ Long service life

CARBOTHIX™.

- ▶ 2-component fast-setting silicate resin for bolt and cable anchoring.
- ▶ Sets in a matter of minutes allowing load to be taken up by bolts and cables almost immediately.
- ▶ Guaranteed mixing ratio eliminates the guessing work and inconsistencies of cement grouting.
- ▶ Can be grouted "top-down" or "bottom-up", providing your operation with optional flexibility.
- ▶ Offered in multiple reaction speeds to accommodate your operations unique conditions.
- ▶ Offered in different volumes (jugs, drums, or totes)
 - Reduce your footprint by using totes.
